### THE SCREEN MACHINE® INTRODUCES INNOVATIVE NEW SCREENING PLANT

**Columbus, Ohio** – Industry leader, **The Screen Machine®**, has announced the introduction of their latest offering in screening plants. The all-new **Spyder 516T** is a self-contained tracked, portable screening plant that leaves its competitors lying in the dust. The **Spyder 516T** is loaded with great features such as standard Caterpillar® tracks, a 5' X 16' double-deck screen with our patented **SMOOTH START™** technology; crusher feed chutes and the heavy duty quality that you've come to expect from **The Screen Machine®**.

Other key features include adjustable T-1 grizzly bars, Grade 80 heavy duty steel construction, remote control travel and operation, adjustable screen angle and a 110 HP *Cummins* diesel engine. The simple design of the **Spyder 516T** allows for easy use and low maintenance.

"This is a significant milestone for our company," said Steven Cohen, The Screen Machine® President and CEO. "We are extremely pleased by the continued growth of our product line and of our ability to set new industry standards year after year. We are committed to designing and manufacturing the best machines in the business, it's just that simple."

Headquartered in Columbus, Ohio, **The Screen Machine®** has been producing innovative shredding and screening plants for over 37 years. All Screen Machine products are proudly made in the USA. Other products include blenders, wash plants, trommel screens, conveyers and 18 unique screening and shredding plants to meet the requirements of any job. For additional information on **The Screen Machine®** or any of our quality machines, visit our web site [www.screenmachine.com](http://www.screenmachine.com), call us at 800-837-3344 or email us at [email@screenmachine.com](mailto:email@screenmachine.com).
