THE SCREEN MACHINE® CRUSHING DIVISION

INTRODUCES THE ALL NEW **4043T IMPACT CRUSHER**

Columbus, Ohio – Industry leader, **The Screen Machine® Crushing Division**, has announced the introduction of their latest offering in tracked portable crushing plants. The **4043T Impact Crusher** is loaded with great features such as standard **Caterpillar® tracks with high speed travel and a Caterpillar® C-9 300 HP engine**, 40" x 43" Horizontal Impact Crusher, 43" x 32" feed Inlet opening, fully remote controlled operation and the heavy duty quality that you've come to expect from **The Screen Machine® Crushing Division**.

Other key features include a unique split housing design that allows for blockage clearance during operation and ease of maintenance, housing is lined with replaceable and interchangeable hardened alloy sideliners, 4 bar, 40" diameter rotor with one piece shaft design and variable speed, single piece blowbars incorporate one piece wedge locking shoe, 3 stage crushing utilizes 2 interchangeable and replaceable anvils and 1 fixed anvil and a hydraulic clutch to prevent costly downtime. The sophisticated design of the **4043T Impact** allows for easy use, high production and low maintenance.

"We are extremely pleased by the continued growth of our product line with the introduction of the **4043T Impact Crusher** and of our ability to set new industry standards year after year. We are committed to designing and manufacturing the best machines in the business, it's just that simple." said Steven Cohen, The Screen Machine® President and CEO.

Headquartered in Columbus, Ohio, **The Screen Machine®** has been producing innovative shredding and screening plants for over 35 years. All Screen Machine products are made in the USA. Other products include blenders, wash plants, trommel screens, conveyors, crushers and 17 unique screening and shredding plants to meet the requirements of any job.
