

## SCREEN MACHINE INDUSTRIES CST CONE CRUSHER ONE OF “TOP 25”

Screen Machine Industries LLC is proud to announce that the track mounted CST Cone crusher has received an award as one of the “Top 25 Rollouts of 2013” from *Aggregates Manager* magazine. This prestigious award is given to new concept products with rare or unique features that increase competition within a product category.

The revolutionary and patent pending model CST machine features a 51” *Quarry-Duty* cone crusher which offers the highest weight to power ratio of any tracked cone plant in the industry. Uniquely designed with a vibratory shaker screen located between the feeder and crushing chamber to pre-screen the fines, this machine provides increased overall production while substantially reducing wear costs.

The SMI lineup also includes tracked jaw and impact crushers, screening plants, trommels, scalpers and conveyors. All utilize quality, name brand components and cutting edge technology. Experience the Screen Machine difference at [www.screenmachine.com](http://www.screenmachine.com).
