

SCREEN MACHINE INDUSTRIES INTRODUCES TRACKED CONE CRUSHER

Screen Machine Industries, Inc. is proud to introduce the track mounted **CST Cone Crusher**. The revolutionary patent pending plant features a massive 51” (1.3m) *Quarry-Duty* cone crusher offering the highest weight to power ratio of any tracked mounted cone in the industry. This uniquely designed plant features a vibratory shaker screen located between the feeder and the cone crusher. Pre-screening the fines will significantly reduce crusher wear costs and increase overall plant production.

This American made machine utilizes Grade 80 steel construction for outstanding strength and durability that will significantly extend the machine’s overall life. Other features include Caterpillar diesel power, heavy duty tracked undercarriage and wireless remote control movement and operation. The numerous advantages of this innovative design will set a new standard for track mounted cone crushers.

Screen Machine Industries offers a full line-up of screens, jaws, impactors and cones that utilize quality, name brand components and cutting edge technology. Innovative designs, patented features, and quality craftsmanship are combined to make Screen Machine Industries the best value for crushing and screening equipment.
