SCREEN MACHINE INDUSTRIES, INC. ANNOUNCES OVERWHELMING RESPONSE AT CONEXPO-CON/AGG 2011

Three new machines and 8 experts surrounded by a sea of thousands of tons of fabricated metal, a resounding level of foot traffic and overwhelming interest describes the experience at booth C-7233 at CONEXPO-CON/AGG 2011. From March 22-26, 2011 the updated 4043T Impact Crusher, newly engineered Spyder 516T Screening Plant and the now infamous 6036T Track Conveyor intrigued droves of onlookers. The capability to have a completely remote controlled operation from crusher to screen to conveyor garnered great acceptance from all levels of field operations and management alike. The crushing and screening industries look to be taking a vast leap forward into a more productive, cost effective and more easily managed future thanks to the three designs featured.
