

Screen Machine Industries, Inc., makers of The Screen Machine® brand, offers one of the most popular small screeners on the market today for landscaping and nursery applications. The Screen Machine® Might II combines a 22 blade high-speed hammermill style shredder with a 3' diameter x 4' long trommel screen for those seeking a fine finished product from a starting material that may contain unwanted debris, clumps, or green waste.

The shredder feature can provide up to 20% more material in your fines pile than an equivalent machine without this feature, maximizing your efficiency. The Might II is powered by a 26hp Yanmar diesel engine, which provides enough horsepower to run an additional 30' stockpiling conveyor.

Screen Machine Industries, Inc. was founded in 1966 and takes pride in offering heavy-duty equipment utilizing American Standard components. Our innovative designs, patented features, and quality craftsmanship combine to make us your best value when it come to screening equipment.
