

Press Release

SCREEN MACHINE INDUSTRIES NOW AVAILABLE ON AGGFLOW

Screen Machine Industries (SMI) will introduce its line-up of machinery to the AggFlow customer base on December 15, 2012. AggFlow is plant simulation and flow analysis software used worldwide throughout the aggregate and mining industry to help customers visualize and maximize their operation. SMI products available on AggFlow include all track and wheel mounted portable screening plants, cones, jaws and impact crushers. AggFlow has added a new conveyor category to accommodate SMI's 6036T Track Stacker. The utilization of AggFlow will undoubtedly demonstrate the many productive and layout advantages that SMI patented products present. SMI dealers and customers will have access to discounted pricing options for an introductory time period. For more information please contact the SMI factory or AggFlow direct.
